

# Installing Java in Windows

The screenshot shows the Oracle Java Downloads page. At the top, there's a navigation bar with links like Products, Industries, Resources, Customers, Partners, Developers, Company, and a search bar. Below the navigation is a banner with the Java logo. The main content area has tabs for Tools and resources, Java downloads (which is selected), and Java archive. A sub-section titled "Java 25, Java 21, and earlier versions available now" is displayed. It includes links for JDK 25 and JDK 21, and a note about the Java SE Subscription. Below this, there's a section for "Java SE Development Kit 25.0.1 downloads" with links for Linux, macOS, and Windows. A note states that JDK 25 binaries are free to use in production and free to redistribute, at no cost, under the Oracle No-Fee Terms and Conditions (NFTC).

```
C:\Users\Riyaz>java -version
Microsoft Windows [Version 10.0.26200.7019]

A screenshot of a web browser displaying the Jenkins download page. The URL is jenkins.io/download/thank-you-downloading-windows-installer-stable/. The page title is 'Java Downloads | Oracle'. The main content starts with 'Thank you for downloading Windows Stable installer'. Below it is a link 'Download hasn't started? Click this link'. There are sections for 'Changing boot configuration' (with a note about Jenkins running at https://localhost:8080) and 'Inheriting your existing Jenkins installation' (with a note about copying old data). At the bottom left is a 'See Also' section with links to 'Running Jenkins behind Internet Information Server (IIS)', 'Running Jenkins behind nginx', and 'Running Jenkins behind Apache'. On the right side, there are download links for 'jenkins.msi' (97.0 MB) and 'jdk-25-windows-x64-bin.msi' (181 MB), both from 7 minutes ago. The browser's address bar also shows the Jenkins download URL.
